***Detailed Actions***

1. Amendments to the Claims submitted on 12/01/2003 are entered. Claim 1 is amended. Claim 2 stays as original. Claims 3 and 4 are cancelled.

***Response to the arguments***

2. Applicant convincingly argues that Wang (5,943,203) does not disclose the overheat protection means, outputting during the overheat protective operation a source voltage having a pulse width shorter than the fix pulse width of the PWM control signal supplied from the control means, as it required in currently amended Claim 1. Rejection to Claim 1 under 35 USC § 102(e) is withdrawn.

***Allowable Subject Matter***

3. Claims 1 and 2 are allowed.

**The following is an examiner's statement of reasons for allowance:**

Independent Claim 1 is allowable because none of the prior art of record disclose a control circuit for a semiconductor device with overheat protection function wherein a overheat protection means during the overheat protective operation outputs a source voltage having a pulse width shorter than the fixed pulse width of the pulse-width modulation control signal supplied from the control means in combination with the other claim limitations.

4. Claim 2 is dependent on allowable Claim 1 and therefore allowable.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
